

Office Security

You have invested heavily in your business and you need to make sure it remains safe and secure. Being better informed and better prepared also reassures your customers and suppliers that you take security seriously, it is good for you, your staff, your business and your reputation.

Building a secure business environment needs an efficiently protection and prevention. The High-value equipment, such as computers, printers, copiers, fax machines etc, is a key target for burglars. With the reality of crime, stealing, acts of terrorism and other risks that would have an impact on your business.

Remember that assets destroyed or stolen are costs you will have to bear, in terms of both replacing the asset itself and of any lost business. You need to ask the question "Could I carry on business as usual when this asset has been lost? ", if the answer is " No ", then you need to protect it. Prevention is always better than cure and it will save you money – invest to save. Being security-minded and having simple security measures in place, you can help to protect your business against crime and make the work of crimes more difficult.

IP surveillance system is designed to secure your office equipment and staff. It not only improves the physical security and property security for your business, also comprises integrated security applications, such as access control, alarm and stock accessing management.

Let's look how intelligent IP surveillance technology can provide a good security solution for your business:

Protect your business from criminal intrusion

The security personnel can see the real-time color video from the control room or any remote location with network connection, offers good surveillance to detect intruders from the office to the area around the outside of the building. Motion detection and alarm functionalities enable the security personnel to detect the unusual event and give the prompt and appropriate response to it.

Comprehensive office security from LanBit

A visitor may be admitted during business hours after giving the receptionist his or her name and presenting photo identification. IP camera installed at the front desk records the video images from the visitor and take a snapshot of the visitor and the photo will be printed on the temporary pass and be saved as evidence.

Integrated security system increases work efficiency

Running an office building brings many important responsibilities. One of the most important is proper security management. Office building security is necessary in order to keep staffs and their belongings safe. Staffs will feel happy and satisfied when they work in the environment where they are sure it is secure and well-protected.

A right security system for warehousing operation

Your warehouse is designed for ease of access, loading and unloading of goods. Vandalism and theft are two of the major security risks to storage and distribution facilities. LanBit IP camera provide multiple functionalities, such as pan, tilt and zoom to perform a continued guard tour monitoring and reduce the risk of crimes.
